Netflix - User Flow and Metrics (GA3_T5)

User Flow for Netflix's Core Feature: Content Discovery and Playback

Netflix's core feature revolves around enabling users to discover and play content effortlessly. Below is a step-by-step breakdown of the user flow:

---

1. Landing on the Home Screen

- **Input**: User logs in or launches the app.
- **Experience**: A personalized dashboard appears, populated with:
  - "Continue Watching" section.
  - Recommended content based on viewing history, preferences, and trending shows/movies.
  - Categorized rows like "Top Picks," "Because You Watched [X]," or genre-specific categories.

---

2. Browsing and Searching

- **Browsing**:
  - Scroll horizontally through rows and vertically to explore categories.
  - Thumbnail previews show trailers or synopses on hover or tap.
- **Searching**:
  - A magnifying glass icon opens a search bar.
  - Predictive search with keyword suggestions, recent searches, and content categories.
  - Filters like genre, language, release year, etc.

---

3. Content Exploration

- **Selection**:
  - User clicks or taps on content to view details.
- **Details Page**:
  - Information includes synopsis, cast, genre, maturity rating, run-time, and user reviews.
  - Options: "Play," "Add to My List," "Rate," and "Download."
- **Decision Support**:
  - Auto-play trailer, "Similar Titles," and social recommendations.

---

4. Playback

- **Initiation**:
  - Clicking "Play" starts playback.
- **Experience**:
  - Seamless transition to video playback.
  - Player includes controls for subtitles, audio, skip intro, fast forward, and rewind.
- **Engagement Tools**:

- End-screen recommendations for binge-watching.
- Automatic next-episode countdown for series.

---

5. Post-Playback and Retention

- **Feedback Loop**:
  - Prompt to rate or thumbs up/down the watched content.
- **Retention Hooks**:
  - Personalized follow-up emails or push notifications (e.g., “Continue your series” or “We’ve added something you might like”).
  - Integration with external social accounts for sharing recommendations.

North Star Metric for Netflix

The **North Star Metric (NSM)** for Netflix is:

Total Hours Watched Per Subscriber Per Month

These metric captures:

1. **User Engagement**: How much content users consume.
2. **Retention**: Indicates long-term customer satisfaction.
3. **Value Delivery**: Ensures users are finding content worth watching, validating the recommendation engine.

Supporting Metrics Related to the Flow

1. **Discovery Metrics**:
   - Percentage of content plays initiated from recommendations.
   - Time spent browsing/searching vs. playing content.
   - Search success rate (searches that lead to playback).
2. **Engagement Metrics**:
   - Daily active users (DAUs) and monthly active users (MAUs).
   - Average session duration.
   - Playback completion rate (percentage of started videos fully watched).
3. **Retention Metrics**:
   - Churn rate.
   - Content retention rate (returning to watch series or finish incomplete titles).
   - Frequency of returning users.
4. **Conversion Metrics**:
   - Percentage of "Add to My List" items played.
   - Trial-to-paid conversion rate.
5. **User Satisfaction Metrics**:
   - Content rating frequency and average scores.
   - Percentage of thumbs up/down interactions.

6. **Platform Performance Metrics**:
    - Buffering time and playback start delay.
    - Error rates during browsing or playback.

Approach to Measuring Success

- Track the **North Star Metric** with supporting metrics over time.
- Use A/B testing to refine features like recommendation algorithms, UI/UX enhancements, and engagement tools.
- Segment metrics by user demographics, geographies, and platform (mobile, desktop, TV).
