Magic Bricks User Segmentation

Prepared By: Tanmoy Pal

1. About the Product

MagicBricks is an online real estate platform in India that facilitates buying, selling, and renting residential and commercial properties. Launched in 2006, it connects buyers, sellers, renters, landlords, developers, and agents. Users can browse listings, view property details, analyze market trends, and access valuation and financing tools.

2. Broad User Segmentation

- Buyers – Users looking to purchase residential or commercial properties.
- Sellers – Users wanting to sell properties.
- Renters – Individuals seeking rental properties.
- Landlords – Property owners renting out spaces.
- Real Estate Agents/Brokers – Professionals listing properties for clients.
- Developers – Builders and companies showcasing new projects.

3. Purpose and Goals of User Segmentation

Why Segment?

- Deliver personalized experiences tailored to user needs.
- Optimize marketing efforts with relevant targeting.
- Identify high-value user groups for resource prioritization.
- Improve retention by addressing segment-specific pain points.

Goals

- Increase platform engagement.
- Improve conversion rates through personalization.
- Enhance customer satisfaction and loyalty.
- Identify underserved segments for expansion.

4. Detailed Segmentation

A. Residential Segment

- First-time Home Buyers – Seeking affordable housing, loan guidance, and schemes.
- Move-up Buyers – Upgrading to larger or premium homes.
- Residential Investors – Purchasing for rental income or resale value.
- NRIs – Overseas Indians investing or planning future settlement.
- Individual Sellers – Homeowners selling for relocation or financial reasons.
- Brokers – Agents representing sellers and managing negotiations.
- Developers – Builders selling newly constructed projects.
- Young Professionals (Renters) – Seeking flexible leases near workplaces.
- Families (Renters) – Looking for family-friendly locations.
- Students – Searching for affordable shared accommodations.
- Expats – Seeking rental homes with specific amenities.
- Long-term Tenants – Stable rental contracts (1+ year).
- Short-term Tenants – Temporary stays or serviced apartments.
- Interior Design Seekers – Renovation and modular solutions.

B. Commercial Segment

- Office Space Buyers – Businesses purchasing for operations.
- Commercial Investors – Buying for rental income or appreciation.
- Commercial Property Sellers – Selling offices, retail, industrial units.
- Commercial Brokers – Specialized commercial agents.
- Commercial Developers – Developing office parks, malls, warehouses.
- Startups & SMEs – Leasing flexible and affordable office spaces.
- Large Enterprises – Seeking premium corporate spaces.
- Retail Space Seekers – Shops, showrooms in high-traffic areas.
- Industrial Property Seekers – Warehouses and manufacturing units.
- Hospitality Investors – Hotels and resort properties.
- Commercial Lessors – Owners leasing business spaces.
- Commercial Lessees – Businesses leasing long-term operational spaces.
- Commercial Interior Designers – Workspace optimization services.

C. Service Seekers & Providers

- Home Loan Seekers – First-time buyers and mortgage applicants.
- Banks & NBFCs – Providing home loan services.
- Loan Consultants – Advisory services for financing.
- Property Management Seekers – Buyers/renters needing maintenance services.

- Legal Advisors – Property transaction and dispute specialists.
- Moving & Cleaning Services – Relocation and property readiness services.

D. Property Enthusiasts

- Investors tracking market trends and appreciation potential.
- Homebuyers monitoring policies, rates, and launches.
- Blog Readers – Following expert insights and advice.
- Real Estate Professionals – Seeking industry knowledge.

5. RFM Analysis

Recency (R):

- **Active Users:**
  - **Interacted within the last 7 days; they show strong recent engagement.**
  - **Action: Recommend personalized suggestions or exclusive content to keep them active.**
- **Moderately Active Users:**
  - **Last interaction was 8–30 days ago; their engagement is slowing down.**
  - **Action: Send re-engagement nudges, reminders, or updates to bring them back.**
- **Inactive Users:**
  - **No interaction in the last 30+ days; risk of churn.**
  - **Action: Target with win-back campaigns, highlights of new features, or special offers.**

Time Measure:

Number of days since the last user interaction.

Frequency (F):

- **Frequent Users:**
  - **Engage daily or multiple times a week; these users are consistent.**
  - **Action: Provide sneak peeks, priority access, or rewards for continued engagement.**
- **Occasional Users:**
  - **Engage 1–2 times a month; moderate but irregular interactions.**
  - **Action: Send curated content, updates, or recommendations to encourage more frequent activity.**
- **Rare Users:**
  - **Engage less than once a quarterly-Annually; infrequent usage patterns.**
  - **Action: Incentivize with tailored promotions, reactivation offers, or reminders.**

RFM Analysis: User Segments

USER SEGMENTS	RECENCY	FREQUENCY	MONETARY
Frequent Buyers	High	High	High
Occasional Buyers	Moderate	Moderate	Moderate
Property Sellers	High	Moderate	High
Frequent Renters	High	High	Low
Landlords	Moderate	High	Moderate
Real Estate Agents	High	High	High
Developers	High	High	High

RFM Analysis Explanation:

- Recency: How recently a user has been active
- Frequency: How often a user interacts
- Monetary: The total value a user brings
- Levels: High (Green), Moderate (Yellow), Low (Red)

Measure:

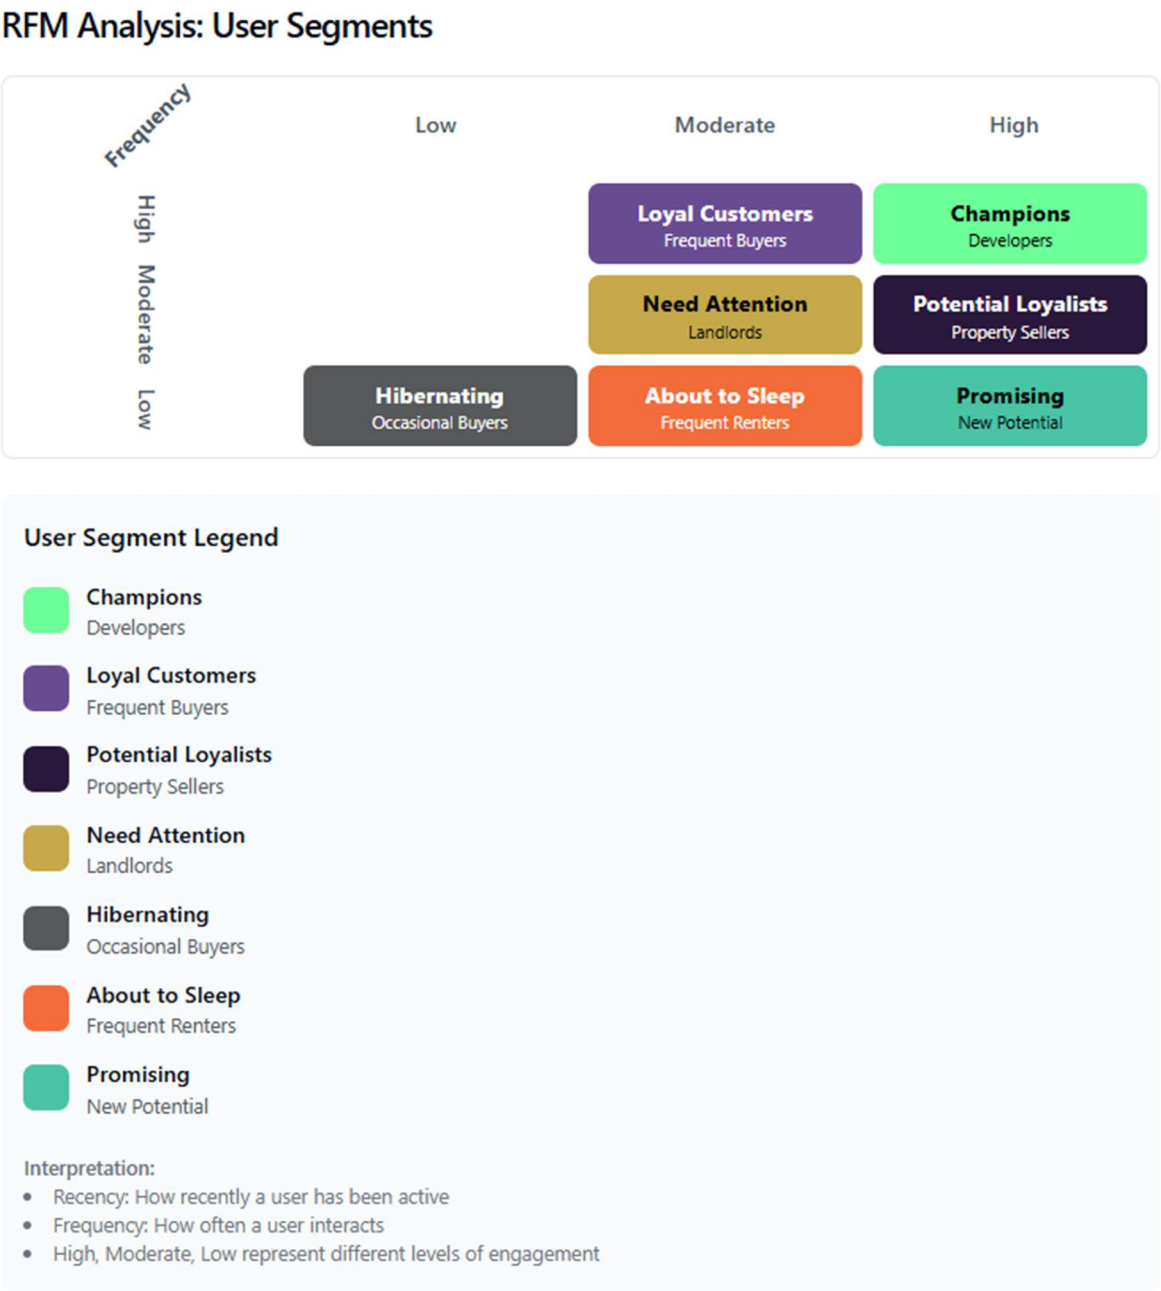
Number of interactions, purchases, or activities in a given time period (e.g., monthly).

Monetary (M):

- **High-Value Users(PRO):**
  - **Contribute significantly**
  - **Action: Reward with premium benefits, exclusive offers, or tailored support.**
- **Moderate-Value Users(BASIC):**
  - **Contribute a reasonable amount but have room to grow.**
  - **Action: Encourage upgrades or increased activity with relevant perks or promotions.**
- **Low-Value Users(FREE):**
  - **Contribute minimally; low monetary return but the user can switch to a higher plan in future.**
  - **Action: Suggest cost-effective options, showcase additional benefits, or re-engage to increase value.**

Measure:

Total contribution value from subscription .



6. Key Takeaways/Conclusion

MagicBricks' segmentation enables it to:

- Deliver personalized solutions tailored to diverse user needs.
- Optimize engagement and conversions through targeted strategies.
- Address specific user behaviors using RFM analysis for retention and growth.
  This user-centric approach positions MagicBricks as a market leader in India's real estate sector.
